Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 Excerpt: . timber has long since been removed, and only small and inferior trees remain. Among the shrubs which make up the undergrowth, the blueberry is the only one of value. A large number of people are employed along the coast during the summer in picking and marketing the berries. a Foster and Whitney s Report of 1850. The following mechanical analysis shows the texture of a typical sample of the Dunesand: MIAMI SAND. The soil of the Miami sanjl, to a depth of 12 inches, is a slightly / loamy sand, interspersed with a small amount of gravel. All grades of sand enter into the composition of the soil, but as a whole it may be said to have a medium texture. The proportion of silt and clay ranges from 4 to 10 per cent, and this, combined with the usually small percentage of organic matter,...
