

Type-2 Fuzzy Logic in Intelligent Control Applications

By Oscar Castillo

Springer-Verlag Berlin and Heidelberg GmbH & Co. K.
Paperback. Book Condition: New. Paperback. 190 pages.
Dimensions: 9.2in. x 6.1in. x 0.5in. We describe in this book, hybrid intelligent systems based mainly on type-2 fuzzy logic for intelligent control. Hybrid intelligent systems combine several intelligent computing paradigms, including fuzzy logic, and bio-inspired optimization algorithms, which can be used to produce powerful automatic control systems. The book is organized in three main parts, which contain a group of chapters around a similar subject. The first part consists of chapters with the main theme of theory and design algorithms, which are basically chapters that propose new models and concepts, which can be the basis for achieving intelligent control with interval type-2 fuzzy logic. The second part of the book is comprised of chapters with the main theme of evolutionary optimization of type-2 fuzzy systems in intelligent control with the aim of designing optimal type-2 fuzzy controllers for complex control problems in diverse areas of application, including mobile robotics, aircraft dynamics systems and hardware implementations. The third part of the book is formed with chapters dealing with the theme of bio-inspired optimization of type-2 fuzzy systems in intelligent control, which includes the application of particle...

Reviews

It is one of the best publications. It is definitely simplistic but excitement in the 50 % in the ebook. I am very happy to let you know that this is basically the greatest publication I have got to go through within my own existence and could be the greatest pdf for ever.

-- **Dr. Anya McKenzie**

This book is definitely worth getting. It usually will not price too much. It has been printed in an extremely simple way in fact it is only right after I finished reading this publication where basically altered me, modified the way I think.

-- **Avery Daugherty**
