Book Release July 13, 2010 Dear friends and colleagues, After a monthly delay, my book **A HOT TEA BY THE GIZA The Real Global Warming, not CO2 hoax** is released in soft cover by US publisher iUniverse. Addressed to young adolescents who will be confronted full on by escalating Global Warming, the book explains a number of issues such as; 1. energy science not keeping pace with energy use brings global warming, 2. polar ice and alpine glaciers mop up human activity generated heat thankfully, 3. at 0 C they clamp Earth temperature to underpin a fluid circulatory cooling, 4. misunderstood centripetal force spawns and sustains all cyclonic swirls, 5. low ambient heat must exit in storm kinetic energy, not radiation as believed, 6. unproven CO2 - greenhouse (GHG) warming theory is scientifically flawed, 7. cloud colour by internal light reflection depends on moisture cooling rate, 8. abrupt cold dry atmospheric downburst colliding with heat jump starts a tornado, 9. surreptitious Bermuda Triangle and flight disappearances without warning, 10. Jet Stream and all other celestial ferocious dust storms share same AGBC origin, 11. radiation is pulsating E-M energy field transmission, not particles in motion, 12. sunlight is an ultra-broadband E-M energy field broadcast, not a photon beam, 13. Earth's magnetic field is born out of the Ionosphere by a relative rotation, 14. intrusive rockets and jet flights intolerably scramble a fragile upper atmosphere 15. dry ionic upper climate reigns over a moisture activated troposphere weather, 16. solutions to reverse global warming and impending calamity unless remedied, 17. a hypothesis on nuclear structure to explain gamma ray (γ) emission in fission, 18. etc. etc. Meant for your 2010 summer leisure reading, hopefully it will be your travel companion...
